PERIYAR E.V.R COLLEGE (AUTONOMOUS), TIRUCHIRAPPALLI-620 023.

PG & RESEARCH DEPARTMENT OF CHEMISTRY

M.Phil. CHEMISTRY – (F.T. & P.T.) COURSE STRUCTURE FROM 2015-2016

SEMESTER	COURSE	TITLE OF THE COURSE	MARKS			CREDITS
			IA	EA	TOTAL	
I SEMESTER	COURSE-I	RESEARCH METHODOLOGY	40	60	100	4
	COURSE-II	RECENT TRENDS IN CHEMISTRY	40	60	100	4
	COURSE-III	SELECTED TOPICS IN CHEMICAL RESEARCH	40	60	100	4
	COURSE-IV	TEACHING AND LEARNING SKILLS	40	60	100	4
II SEMESTER	-	DISSERTATION AND VIVA-VOCE	-	-	200 (150+50)	8

Semester	Course	Course Title	Marks			Credit
			IA	EA	Total	
I	Course-I	Research Methodology	40	60	100	4

Unit-I	**Survey of Literature**
1.1	Need for literature survey-Primary, Secondary and Tertiary Sources. Journals, Chemical Abstracts - Subject index, Substance index, Author Index, Formula index and other indices. Other similar abstracts for special topics. Current Titles-Reviews – Monographs - Selection of Research topic-Selection of Research Facility –Location of Journals and Articles.
1.2	Use of computers in the Literature Survey – Websites – Search Engines, Internet, E-mail. Scientific Information and Documentation centers - INSDOC, BANSDOC, NCSI, British Library – Digital Library - e-Journals - e-Content.
Unit-II	**Presentation of Research Output**
2.1	Research Paper - Preparation of Manuscript for Publication in National and International Journals like Indian Journal of Chemistry (Section A and Section B), Journal of Indian Chemical Society, Current Science, Journal of American Chemical Society and Tetrahedron.
2.2	Thesis - Rough drafting-Title, Abstract, Introduction, Scope of the Work, Literature Review, Problem and Time Limitation, Experimental Methods, Results and Discussion, Foot Notes. Data Presentation - Figures and Tables. Sign Conventions followed. Bibliography - Conclusion and Recommendations. Abbreviations used. Storing and Retrieval of Information using Computer-CD, Pen Drive and DVD.
Unit-III	**Data Analysis**
3.1	Error Analysis - Errors – Types – Precision and accuracy – Significant figures – Tests for accuracy of results – Positive and negative deviation from accuracy – Distributions: Normal, Binomial and Gaussian-The normal distribution of random errors – Mean value - Variance – Standard deviation – Correlation coefficient-Curve fitting-Method of Least Squares- Reliability interval – t-test, F-test, Q-test and Chi-Square test – Regression analysis –Multiple linear Regression – Observation and Inference.
Unit-IV	**Separation and Purification Techniques**
4.1	Extraction – Solvent extraction Principle – Theory – Different methods of extraction.
4.2	Separation techniques – Chromatography – Paper, Thin layer, Column, Ion-Exchange, Gas, HPLC and GC-MS. Principles and uses of other separation techniques: Filtration and Crystallization.
Unit-V	**Computers in Chemistry**
5.1	Introduction to computers–history of computers -Main frame, mini, micro and super computer systems–Computer hardware -CPU, input, output devices, auxillary storage devices, interpreter, compiler–Languages–C Language & Programming–Constants, variables, function –Logical & Arithmetic statements–Transfer & control structure–arrays-pointers–File handling procedures.
5.2	Simple programming examples from chemistry like Temperature conversion, Calculation of

	frequency of electromagnetic Radiation, Cν of solid (Cν at T<30 K and at T>30 K), Activity coefficient of Electrolytes, Rate constants of I & II order reactions, $t_{1/2}$ of I, II & III order reactions, Calculation of Arrhenius Parameters, Calculation of Modes of Vibration.

Semester	Course	Course Title	Marks			Credit
			IA	EA	Total	
I	Course-II	Recent Trends in Chemistry	40	60	100	4

Unit-I	**Retrosynthesis and Functional Group Interconversions**
1.1	Synthons and Synthetic equivalents – donors and acceptors – Regioselective and Stereo selective alkylation of cyclic ketones & cyclic enones. Retro synthetic Analysis of acyclic and cyclic compounds - one and two group disconnections.
1.2	Interconversions of functional groups like C = O, -CHO, -OH, -SH, -COOH, -NH_2, -COOR, -CONHR, C = C. Reversible protection of reactive sites.
Unit-II	**Green Chemistry**
2.1	Green Chemistry- Need, Goals, Limitations and Progress. Heterogeneous reaction of green chemistry. Alternative solvents: ionic liquids, super critical fluid extraction and organic synthesis using water resistant Lewis acids.
2.2	Microwave assisted organic synthesis – the reaction vessel, medium, advantages, limitations and applications. Microwave assisted reactions in water: Hoffmann elimination, hydrolysis, oxidation of alcohols and saponification – Microwave assisted reactions in organic solvents: Esterification, Diels-Alder reaction, decarboxylation – Solvent free microwave reactions: deprotanation, saponification of esters, and synthesis of anhydrides from dicarboxylic acids.
2.3	The use of Ultrasound in organic synthesis: Introduction and Instrumentation. Types of Sonochemical reactions: Esterification, substitution, oxidation and reduction.
Unit-III	**Nanochemistry**
3.1	Introduction – types of nanotechnology and nanomachines – molecular nanotechnology – Scanning Electron Microscope (SEM) – modern Transmission Electron Microscope (TEM) – Scanning Probe Microscope (SPM) – Atomic Force Microscope (AFM) – nano dots – nano materials – preparation – plasma arching – sol gels – electro deposition – ball milling.
3.2	**Applications of nanomaterials**: carbon nano tubes – molecular switches – rotaxanes and catenanes – lithography – nano biometrics –future applications.
Unit-IV	**Cheminformatics**
4.1	**Basics of Cheminformatics**: Introduction – evolution – history of chemical information science – uses of Cheminformatics.
4.2	**Drug design and discovery**: Development of drug – pharmacodynamics – biological testing and bioassays – chemical parameters in drug design – physicochemical parameters in drug

	design – structure based drug design – drug discovery.
Unit-V	**Advanced Instrumental Techniques**
5.1	Principles and applications of 2D NMR (COSY, HMBC, HSQC and NOESY), XPS and ENDOR spectroscopy (Instrumentation is not needed).

Semester	Course	Course Title	Marks			Credit
			IA	EA	Total	
I	Course-III	Selected Topics in Chemical Research	40	60	100	4

Unit-I	**Coordination Chemistry**
1.1	Methods of preparation of coordination compounds – Analysis and determination of molecular formula – Volumetric, gravimetric and colorimetric methods – Conductance and magnetic measurements and complexes.
1.2	Characterization of metal complexes by UV, IR, NMR and ESR studies.
Unit-II	**Bioorganic Chemistry**
2.1	Biosynthesis of proteins-role of DNA and RNA.
2.2	Determination of base sequence of DNA-polymerase chain reaction (PCR)-antisense technology in chemotherapy and other nucleic acid-targeted drugs-DNA binding-fundamental interactions with nucleic acids-Binding of tris (phenanthroline) metal complexes with DNA- Techniques to monitor binding-Applications of different metal complexes that bind nucleic acids.
Unit-III	**Water analysis**
3.1	Methods and procedure for the estimation of Dissolved Oxygen (DO), Biological Oxygen Demand(BOD), Chemical Oxygen Demand(COD), Temporary and Total hardness, Acidity, Alkalinity, Heavy metals and Fluoride.
3.2	Water Quality parameters for domestic, industrial and agricultural usage (Indian and WHO standards).
Unit-IV	**Reagents in Organic Synthesis**
4.1	**The survey of reactions and reagents**: NaH, $LiAlH_4$, Tri-tertiary butoxy Aluminium hydride, $NaCNBH_3$, $SiMe_3H$, Alkali metal in acidic, basic, neutral solvents, hydrazines, Osmium tetroxide, Chromyl chloride, Ozone, LTA, Selenium diozide, dioxane, Gilman's

	reagent, LDA-DCC, Wilkinson's catalyst, DDQ, Evans' catalyst, zeolites.
Unit-V	**Corrosion & Adsorption**
5.1	**Corrosion** – Types - dry, wet, galvanic, concentration cell, pittig, stress and microbial.
5.2	**Corrosion monitoring techniques**: Electrochemical Non-Electrochemical methods.
5.3	**Adsorption**-Choice of adsorbents for the removal of heavy metals- Natural and Synthetic adsorbents – Effect of Variable parameters (Dosage of adsorbents, Initial Concentration, Contact Time, Initial pH and Temperature)- Adsorption Isotherms-Freundlich and Langmuir.
